

## You are the difference!

STS is a non-profit 501(c)(3) organization, established in 1983, that raises and distributes funds to help gifted and talented students attend summer enrichment activities not provided by the school.

We have no paid staff. At least 98% of all donated funds go directly to supporting students.

Your investment will help to prepare the “best-and-brightest” of today’s students for tomorrow’s community leadership roles. Invest in the future through STS!

*“Learning is much more special when the opportunity is given to someone as a gift. Thank you for the scholarship.”

## STS' purpose

Support for Talented Students (STS) provides financial aid to identified gifted and talented elementary and secondary students in the Columbus metro area whose parents or guardians cannot afford to send them to summer enrichment programs. These summer activities are available for advanced studies in areas such as science, technology, engineering, art, math, language, music, dance, theater and art.

Nurturing talent takes money. Many gifted students come from homes where extra dollars are hard -- if not impossible -- to come by.

## The scholarship process summary

See [supportfortalentedstudents.org](http://supportfortalentedstudents.org) for full details.

- Parents/guardians and students apply to a qualified program. Then the family applies to STS to help fund the experience. The STS website is usually available no later than the first of the year.
- A school gifted coordinator or other teacher who has classroom experience with that student must recommend the student.
- Students are then selected for scholarships based on factors such as family income, funds available and other factors.

## It is "cool" to be smart
